Aleksandr Smyshliaev

React.js Frontend Developer (React.js/Next.js focus)
Tbilisi, Georgia

Summary

Hi, I am a Senior Frontend Developer with 7+ years of experience specializing in JavaScript/Typescript and React.js for creating interactive user interfaces, focused mostly on React.js in B2B/B2C complex apps.

I was always passionate about IT, solving problems, improving stuff, and creating cool things to improve people's lives.

How I work: Choosing the right tool for the job and not because of hype, iterate a few times until outcome good, and don't forget about keep things maintainable, so it won't slow the whole team down.

Familiar with industry best practices, automated testing, DevOps culture, integrating UI with API endpoints, and creating UI from Figma mockups.

Have legal entity for contract work, have experience with remote work (including US-based companies)

- Bachelor of Technology in Computer Science.
- English level C1 by CEFR.
- My hobby project is <https://github.com/asmyshlyaev177/react-horizontal-scrolling-menu> (used on Amazon and other production apps).
- Another one with Next.js, review my code and see for yourself <https://github.com/asmyshlyaev177/state-in-url>

Experience

Channels (ChannelTech)
Senior Frontend Developer
October 2024 - Present (1 year)
Tbilisi, Georgia

- Implementing new features according to design and feedback

- Refactoring old code
- Created a Landing page with SEO metadata
- Writing integration and unit tests

SiliconMint

Frontend Developer

May 2022 - October 2024 (2 years 6 months)

Tbilisi, Georgia

First project:

- Improved app performance and reduced network load by developing custom React hook for caching images urls from CDN
- Created new page with project progress and photo gallery using React and styled-components
- Eliminated flakiness from Cypress tests CI/CD pipeline
- Various bug fixes, code reviews, discussions etc

Second project:

- Created "Find My Meds" page with filters, results list, google map, and good test coverage
- Developed reusable hook for storing temporary UI values in page URL, refactored a dozen of list pages to use it
- Created reusable select component (similar to MaterialUI) with custom functionality using Cypress component testing for TDD
- Improved network performance up to 2 times by utilizing gzip compression for backend communication
- Initiated and started to execute a strategic plan in Jira for refactoring legacy code to improve code quality and maintainability
- Optimized webpack configuration, eslint, and the CI/CD pipeline

Omise Co., Ltd.

Frontend Developer

June 2019 - March 2022 (2 years 10 months)

Bangkok Metropolitan Area, Thailand

- Development and maintenance of a React-based dashboard (utilizing GraphQL, styled-components, etc.) for the company
- Created a JavaScript SDK prototype to connect native mobile wrapper with JS miniapps
- Developed internal dashboard leveraging charts on D3.js
- Collaborated closely with backend developers to establish API specifications and functionality

- Played a role in extensive code refactoring and actively contributed to code reviews

Ongrad

Frontend Web Developer

June 2018 - November 2018 (6 months)

Moscow, Russian Federation
